Sleep Disorders

Approximately one in five people suffers from a sleep disorder. The proper diagnosis & treatment of sleep disorders is essential in helping patients achieve a better quality of life. As Sleep Medicine Physicians we have seen patients benefit from the work done in the sleep lab at Brooks Memorial Hospital.

The Sleep Lab at Brooks has been in operation since the year 2000 and recently expanded services to add the Sleep Clinic to evaluate patients for sleep disorders and prescribe diagnostic testing and treatment for each patient's specific disorder.

The sleep lab rooms at Brooks offer all of the amenities of home, and testing is performed by New York State licensed medical professionals. The clinical staff and the quality of the Brooks facility offer area residents the finest care available.

The proceeds from this year's golf tournament will benefit the Brooks Sleep Lab. New equipment will allow us to stay current in a highly technical field and surpass the requirements of the American Academy of Sleep Medicine. A new handicap accessible bathroom will improve the care provided to patients with physical limitations.

As sleep medicine physicians we are dedicated to helping patients get treatment for their sleep disorders and live their lives to the fullest. By participating or donating to this charitable golf tournament you can be a part of bringing the Brooks Memorial Hospital Sleep Lab renovation to reality.

Thank you for your participation in the golf tournament and your support of Brooks Memorial Hospital. Projects like the sleep lab renovation would not be possible without your participation.
